Plz help me with this problem

I've been all over the web with this issue and I just can't get anything to work. I've been at this for over a week now....

I have a webpage (clientoverview.aspx). I need something to convert that page to a .PDF file and save it on my pc. I need the PDF to look like the webpage (css and all).

I tried iTextSharp, but can't get it to work. Can anybody please post a "TESTED" script or c# code to do this?

We can't buy any products to do this (Client doesn't want to do it like that)...

Bummer... 😞 😞
